

I am writing to share my concern over the possibility of Low Power FM stations being given priority over FM translator stations. My family listens extensively and almost exclusively to K-LOVE, which is broadcast over a FM translator station. This concerns me greatly as a parent of small children. With K-LOVE, we have music and news in our home that coincides and reinforces the values we hold dear. There is so much on the airwaves that we prefer not to allow into our home. K-LOVE offers us a safe alternative that the entire family enjoys. This service provided by L-LOVE is in the public interest because so many families find themselves in the same situation we are in. There is no way to eliminate the sex and violence filled media from ever entering people's lives, but this station offers at least one service, in at least one avenue that does just that.
